### **About the Service:**

The Haringey Wellbeing Network (HWN) is a mental health and wellbeing community support service for the London Borough of Haringey. The network is made up of three specialist mental health organisations, Mind in Haringey are the lead contractor; this service is the single point of entry for all community mental health support needs in Haringey.

The network aims to support the community by providing better access to a range of support services for adults living in Haringey. These are designed to help build resilience and reduce the onset of mental health problems by focusing on and helping individuals achieve positive outcomes in the following key areas:

- Mental Wellbeing
- Physical health
- Social networks
- Self-management

## **About the Role:**

The Haringey Wellbeing Network shall be working in partnership with the Federated 4 Health, focusing on improving physical health outcomes for those living with Severe and Enduring Mental Illness (SMI) within the BAME community.

The aim of this work is to create a seamless and integrated physical health check service, which improves outcome targets and builds better rates of engagement within the BAME community.

Haringey has a higher than average prevalence of people with SMI (1.3%) compared to the rest of London (1.1) and England (0.9%) respectively. In Haringey, 3% of people from Black or Black British ethnicity have a diagnosis of SMI, higher than any other ethnic groups. Furthermore, EMIS GP clinical system data suggests that between 55% and 65% of all people on the SMI register in Haringey are from a BAME community.

National and local strategies such as the Fiver Year Forward View for Mental Health – NHS England and the Haringey Borough plan 2019-2020 aim to reduce inequalities and structural barriers to mental health from a social and health care perspective.

In Haringey, people with SMI experience poorer health outcomes than the general population.

- Haringey MH focused JSNA suggests that people with an SMI had twice as many hospital admissions than the general population. People with SMI had 449 hospital admission compared to the general population (242) at a rate per 1,000 patients.
- Over 50% of people with a SMI have one or more long term condition.
- More than one third of people with SMI (37%) are smokers compared to the general population.
- People with a SMI are more than likely to be obese (29%) than the general population (12%).

## **JOB PURPOSE**

The aim of this role is to champion diversity to encourage and promote inclusion and equality for those from black, Asian and minority ethnic backgrounds.

The purpose of the BAME Community Advocate is to support the work of the Federated 4 Health, which is commissioned to focused on improving the

uptake of Physical Health Checks with people living with a SMI. The Community Advocate will enable a joined-up approach in identifying and coordinating patient care with local community groups and secondary care services. In addition, the community advocate is expected to manage the SMI registers for the Haringey Wellbeing Network and report to the Federation.
